resurreccionerick.github.io 

A developer with experience in both mobile and web development. I have worked on a variety of projects, including **Cross-Platform** and **Native Android** Development, as well as **Web** Development.

Education

- **STI College Meycauayan** – Bachelor of Science in Information Technology

Experience

Hooli Software – Software Engineer Intern (Full Stack)

- Actively contributed to real-world projects by utilizing React Native, React.js, and Node.js.
- Working collaboratively with a team of developers, contributed to the implementation of features, resolution of bugs, and meeting project deadlines.
- Assisted in designing and implementing user interface, resulting in improved usability and enhanced user experience.
- Gained hands-on experience with industry best practices, version control systems, and project management tools, while effectively communicating with team members, providing regular updates on progress, and addressing any concerns or questions.

Skills

- | | |
